

INTRODUCING A QUICKER PROVEN PATH TO THE CLOUD FOR IBM POWER

Skytap on Azure Quick Start: IBM Power to Azure 4-Week POC

Curious how you can run IBM i and AIX workloads as-is natively in Azure? Let Skytap be your guide. Our expert Services Delivery Team will lead your organization through a 4-week proof-of-concept to accelerate your IBM Power in the cloud journey.

What's included:

- Migration of two IBM LPARs from on-premises to Skytap on Azure
- Planning and implementation of the Skytap landing zone including network configuration
- Support for creation of the on-premises backup images
- Guidance and support for the migration of data from on-premises to Skytap. Includes building infrastructure components (i.e. NIS, NIM) within Skytap to support data migration if applicable.
- Restoring of exact copies of the LPARs from the current system to Skytap on Azure

Qualifying requirements:

- Selected LPARs must be < 2TB of storage each
- OS must be a [Skytap supported level](#)

Email contactus@skytap.com for pricing and start your IBM Power to Azure 4-Week POC today!
