

Skytap on Azure for IBM i Production Workloads with Assure MIMIX for HA/DR

Migrate and run IBM i production workloads natively in Azure with Skytap and protect them with high availability/disaster recovery from Assure MIMIX.

Unlock cloud scalability and agility for IBM i production workloads with Skytap

Skytap is the only cloud infrastructure-as-a-service purpose-built to run IBM Power workloads natively in Azure. It provides a simple, low-risk path to the cloud for IBM i workloads because it doesn't require costly and timely refactoring, re-platforming or rewriting of applications.

Once migrated, your IBM i workloads run natively in Azure, gaining cloud scalability and agility. Workloads can also be connected to Azure native services such as AI, machine learning, advanced analytics, and monitoring to drive incremental value from your IBM Power investments.

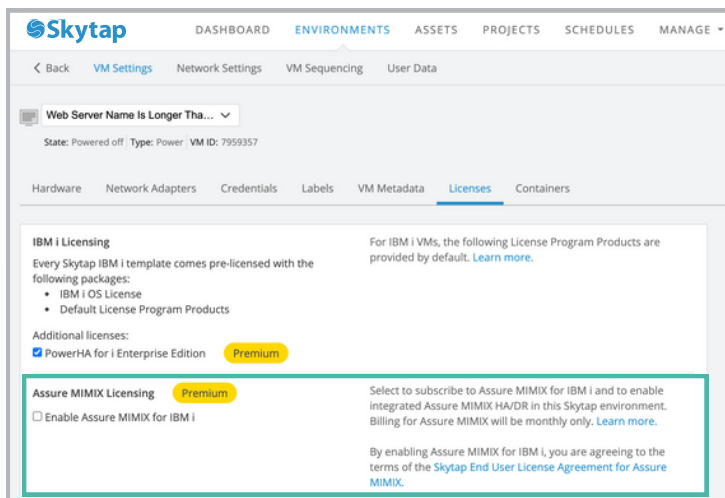

Accelerate time to value with integrated HA/DR Solution from Assure MIMIX

When you open a Skytap account in the Azure Marketplace, Skytap makes it easy for you to natively support replication for IBM i workloads with an integrated HA/DR solution from Assure MIMIX. Simply enable this option in your Skytap Power VM settings. If you are already using Assure MIMIX for your IBM i HA/DR, solution, you can transfer your MIMIX installation to Skytap. More about Assure MIMIX

Assure MIMIX is the world's leading high availability and disaster recovery solution for IBM i. Thousands of companies depend on Assure MIMIX to protect their business against data loss and unplanned downtime and to virtually eliminate planned downtime. [Learn more.](#)

- Highly efficient, multi-threaded replication eliminates latency, ensuring you can meet the most stringent recovery point objectives
- Fast, automated failover and switching ensure near-zero downtime
- Replicates journaled and "non-journalable" data and objects in real time, with bit-level accuracy
- Easily extends and scales replication to enable real-time data distribution for queries and reporting, advanced business analytics, DevOps, ecommerce, and more
- IBM i OS, server, and storage system version agnostic, so you can extend Assure MIMIX protection to all your IBM i systems
